Held in

DEFENCE TECHNOLOGY ASIA (DTA) 2010
19 – 20 May, Singapore Expo
Technology – The Force Differentiator

About DTA 2010

Defence Technology Asia (DTA) Conference & Exhibition series returns in 2010 as the premier naval technology event held for the region. Established now as the world-class Defence forum in Singapore, DTA 2010 focuses on Submarine & ASW and Naval Surface Ship Technologies and Unmanned Vehicles & Systems.

DTA 2010 annually brings leading Defence Organisations and their domain experts in face-to-face interactions with regional Navies, procurement agencies, R&D organisations, Operators and Technologists and their decision makers to discuss new & emerging Technology Innovations and facilitate the understanding of the needs of the Navies.

5 Reasons why you cannot miss DTA 2010...

1. Held in Singapore at a premier venue allowing for co-location of the conference and the exhibition. The venue will facilitate private meetings & discussions, B2B interactions and maximize the exposure of your organisation's products and services.
2. Over **300+** key members of Defence organisations from Singapore, the region and globally have confirmed their attendance! They represent key decision makers, operators and technologists from the navies, procurement agencies and research & development organisations.
3. Brings together experts from around the world to Singapore, creating a unique environment that allows industry and end-users to exchange know-how and share experiences, in technologies applicable for today's navies under the theme – *Technology the Force Differentiator*.
4. DTA 2010 will address specific requirements of Users in Asia and beyond. The content for the conference is specifically designed to represent the latest in naval capabilities and technologies.
5. Expect **40+** international speakers from the US, France, Italy, Sweden, India and the region delivering world-class case studies and breakthrough information.
