

DTC Conferences

International Conferences & Exhibition Series

DTC Conferences (DTC) aims to bring international and regional technology experts and best in breed organisations to Singapore to create a unique conference and exhibition environment that allows industry and end users to exchange know-how and share experiences in the fields of **Defence and National Security (DTA Series)**, **Satellites Technology (SATTECH Series)** and **Logistics (D-Logistics Seminar)**.

Government and Commercial organisations and end-users will come together to discuss and exchange ideas on technologies in specialized areas relating to Asia, particularly South-East Asia.

Uniquely focused in its content, **DTC Conferences** will bring together key decision makers and leading international experts from the government and commercial organisations.

The Events are customized to reflect the specific requirements of the Users in the region and beyond. The content will reflect a fully integrated Event, representing the very latest in capabilities and technologies spanning every aspect of a nation's needs.

In each Event, there will also be an Exhibition which will provide a unique platform showcasing the latest technologies in equipment and operational systems from the world's leading industries.

Unlike other major regional Events, **DTC Conferences** is strongly focused on Technology and its benefit(s). Hence, it will provide an excellent opportunity for all attendees/participants to exchange know-how and share experiences, in application(s) of current leading-edge technology, planning and operations, procurement and logistics.

With National and Regional Security being a primary concern in today's world, especially in the Southeast Asia Region, many countries are also interested in preparing themselves with the capability to face a new unknown and unseen enemy, which hitherto never existed. It is, therefore, timely to provide a fresh avenue for all to interact and build new relationships and exchange views and information on the latest technologies available to deal with such threats.

This is truly a unique Event series you cannot afford to miss.

Yours sincerely

Thomas Vergis
Chief Executive
