

## Corporate Profile

### About Us

Launched in May 2001, DTC Conferences's mission is to bring users and suppliers in the Defence field together. Its services include Organisation of Conferences and Exhibitions and Provision of Support Services and Technology Consultancy.

DTC Conferences also operates a state-of-the-art Defence Exchange on the Internet – a B2B facility connecting users and suppliers providing a one-stop shop for defence products, information and services. The site is designed to facilitate e-dialogue between manufacturers and defence agencies, providing a Gateway to the Asian Defence Market.

Both our subsidiaries, DTC Conferences and Display Works have organised many highly successful international conferences that have seen strong participation and support from Defence specialists from Europe, USA, and the Asia Pacific Region, including Singapore.

Encouraged by the positive feedback of the Suppliers and users and as part of DTC Conferences ongoing activities, DTC Conferences has launched Defence Technology Conferences Support Services (DTCSS) to assist our valued clients to enhance the operations in the region.

### Goals

To be the premiere platform in which Suppliers and End-Users of Defence Technologies are able to come together to network, share ideas and exchange information.
